India-Indonesia Relations: Economic Opportunities in a Strategic Partnership

Advitya Bahl

India and Indonesia share warm and friendly ties spanning over millania rooted in cultural, historical, and geopolitical ties. As a comprehensive strategic partner, Indonesia is an important pillar in India's "Act East" policy and India's vision of the Indo-Pacific. The exchange of Hinduism, Buddhism, and later Islam shaped Indonesia's cultural landscape, while shared colonial struggles and independence pursuits fostered camaraderie. Both nations played key roles in the Bandung Conference (1955) and the Non-Aligned Movement, strengthening their commitment to decolonisation and independent foreign policy. Celebrating 75 years of diplomatic ties in 2024, the partnership spans political, economic, cultural, and strategic domains. Milestones like the Comprehensive Strategic Partnership (2018) and joint naval exercises such as *Samudra Shakti* highlight defence and maritime cooperation. Economic ties have grown, with India importing coal and palm oil and exporting refined petroleum and machinery. However, trade imbalances persist, prompting discussions on mechanisms like Compre-

The MEA has announced that the President of the Republic of Indonesia H.E. Prabowo Subianto will be the Chief Guest of India's 76th Republic Day celebrations.

hensive Economic Cooperation Agreement (CECA). Cultural exchanges, direct flights, and academic collaborations further enhance people-to-people links. Strategically, the partnership is crucial in the Indo-Pacific, aligning with shared goals of stability and regional security.

Despite challenges, both nations are committed to fostering connectivity, innovation, and multilateral collaboration, ensuring mutual growth and regional prosperity.

Trade Relations

India's economic liberalisation in the 1990s and its subsequent *Look East* and *Act East* policies paved the way for enhanced connectivity with Southeast Asia, particularly Indonesia. Agreements like the ASEAN- India Free Trade Agreement (AIFTA) and the ASEAN- India Trade in Goods and Services Agreements (AITIGA) have significantly bolstered trade by reducing tariffs and enhancing market access. These frameworks facilitated Indonesia's emergence as one of India's top trading partners within ASEAN. By 2022, Indonesia surpassed Singapore as India's sixth-largest global trading partner.

Imports: India's imports from Indonesia surged between 2020 and 2022, driven by policy shifts that reduced duties on crude palm oil and other vegetable oils. This spike was further

Happy Republic Day

Zorawar Light Tank: A Testament to India's Self-Reliance in Defence Innovation

Ravi Gupta

Designed, developed, realised and demonstrated in a record time of just three years by the DRDO in association with our own industries, Zorawar, the Indian Light Tank (ILT) has been making news and is all set to redefine tank warfare. According to a press release of M/o Defence, In an

integrated manner, the design to realisation to demonstration at high altitude has been achieved in three years. The Indian Light Tank (ILT) has achieved a major milestone by firing a number of rounds at different ranges at an altitude of more than 4200m, at a High Altitude Location with consistently accurate results.

With Larsen & Toubro Ltd. as the main collaborator, a large number of Micro, Small, and Medium Enterprises (MSMEs) of Bharat have contributed to the development of various sub-systems. Thus, this development is also a demonstration of Bharat's prowess in rapid design, development, realisation, testing and evaluation of such highly complex military 'systems of system' for the world's most demanding and challenging battlefield conditions prevalent in high altitude regions of our country. Zorawar has been designed as a 25-ton class modern armoured combat vehicle to meet the specific requirements of our Armed Forces for such high altitude applications, making it transportable by rail, road as well as air.

Battle tanks have been an essential component of military offensives since their invention in

1915 and use in World War-I (WW-I). Tanks are designed to keep the soldier armed with required firepower and mobility while remaining protected during military offensives. A modern battle tank is equipped with a variety of weapons, sensors and equipment, providing a wide range of assistance to soldiers, in addition to fulfilling primary requirements of Protection, Mobility and Firepower.

Tech Meets Travel: Emerging Careers in Tourism

Ranjana Kumari

India's tourism sector is a kaleidoscope of culture, heritage, and natural and modern marvels, drawing travelers from every corner of the globe. India offers a vibrant mix of experiences-be it the serene villages, tranquil mountains, bustling markets, alluring luxury cruises, or the burgeoning niche of medical value tourism. The nation's diverse topography, rich history, and affordable yet world-

class hospitality and healthcare have made it a sought-after for both leisure and purpose-driven travelers.

The Government of India has launched a range of impactful initiatives to promote tourism and skill development, fostering sustainable and inclusive growth in the sector. The Swadesh Darshan Scheme and PRASHAD Scheme focus on developing theme-based tourist circuits and rejuvenating pilgrimage sites, respectively, to promote cultural, heritage, and spiritual tourism. The Incredible India Tourist Facilitator (IITF) Certification Programme and Capacity Building for Service Providers (CBSP) Scheme aim to enhance skills and employment opportunities through training and certification, while the 'Hunar Se Rozgar Tak' (HSRT) programme provides short-term hospitality training to youth. Adopt a Heritage: 'Apni Dharohar, Apni Pehchaan' encourages private and public investment in developing heritage site amenities. The 'Dekho Apna Desh' Initiative promotes domestic tourism, and the RCS-UDAN Scheme enhances regional air connectivity, making travel more accessible.

Together, these initiatives drive infrastructure development, skill enhancement, and sustainable tourism across India.

A Catalyst for Employment

India's tourism sector witnessed remarkable progress in 2024, with a strong focus on employment generation and skill development. Key highlights include:

- International Tourist Arrivals (ITAs): 18.89 Million (2023).
- Foreign Exchange Earnings (FEEs): Rs. 231,927 Crore (2023).
- Domestic Tourist Visits (DTVs): 2,509 Million (2023).

India's tourism sector's potential for employment generation is immense. According to the World Travel and Tourism Council, India's tourism industry could support over 100 million jobs by 2030, fueled by both direct and indirect opportunities. From traditional roles in hospitality and transportation to emerging opportunities in wellness tourism, eco-tourism, and digital tourism marketing, the sector is a cornerstone of India's job creation strategy. Rural tourism alone is poised to empower countless artisans and entrepreneurs, while the inland cruise tourism industry is set to create specialised roles in logistics, hospitality, and maritime operations. Meanwhile, medical value tourism is fostering employment in healthcare, translation services, and patient care management.

Tech Savvy Tourism Careers

Technology is revolutionising the tourism sector, transforming it into a dynamic hub of innovation that reshapes how destinations are discovered, experienced, and managed. From Virtual

Reality (VR) tours that allow travelers to explore locations from the comfort of their homes to AI-driven chatbots providing personalised travel recommendations, the integration of advanced technologies is unlocking new possibilities. This evolution creates unique roles that merge traditional expertise in hospitality, travel planning, and cultural knowledge with cutting-edge digital skills such as data analytics, app development, and user experience design.

For aspirants with a tech-savvy mindset, the opportunities in this sector are truly boundless. Professionals can engage in diverse areas such as developing Augmented Reality (AR) applications for immersive tourism experiences, managing smart destinations powered by the Internet of Things (IoT), or leveraging Big Data to predict travel trends and optimise customer satisfaction. Moreover, the rise of sustainable tourism powered by technology opens avenues for eco-conscious innovators to design solutions that reduce environmental impact while enhancing the traveler's journey.

A Fertile Ground for Startups

The tourism sector offers a dynamic platform for startups to innovate and transform the way people travel. Startups are leveraging AI-powered tools to revolutionise trip planning and create personalised travel experiences. Platforms enabling community-based tourism are redefining accommodations, connecting travellers with unique local stays. In the realm of eco-tourism, sustainable travel solutions are addressing the growing demand for responsible tourism. AR/VR technologies are being utilised to provide immersive virtual tours, allowing

Top Tech Savvy Tourism Careers			
Career	Role	Key Skills	Impact
Digital Marketing Specialist	Designs and executes online campaigns to promote destinations, travel experiences, and related services.	SEO, social media marketing, content creation, pay-per-click advertising.	Enhances the visibility of destinations and engages potential travellers in a competitive online space.
Travel Tech Developers	Develops platforms and tools such as booking engines, travel apps, or virtual tours.	Business acumen, coding, app development, UX/UI design.	Creates solutions that streamline travel processes and enhance customer experience.
AI and Chatbot Specialist	Designs automated systems to assist with bookings, itinerary planning, and real-time customer support.	Machine learning, natural language processing, customer service.	Improves efficiency and provides personalised support to travellers.
VR and AR Developer	Creates immersive virtual tours and AR-enhanced travel guides.	Programming, 3D modelling, multi-media design.	Enables travellers to explore destinations virtually and enhances marketing efforts.
Big Data Analyst	Uses big data to predict travel trends, optimise pricing, and analyse traveller behaviour.	Data analysis, statistical modelling, analytics software.	Provides insights for informed decision-making and enhances customer satisfaction.
Smart Destination Manager	Oversees destinations equipped with IoT and smart technology for seamless experiences.	IoT management, project planning, sustainability practices.	Develops smart cities and tourist hubs that are efficient, eco-friendly, and personalised.
Content Creator/Travel Influencer	Produces engaging content such as blogs, videos, and photography to showcase destinations.	Storytelling, video editing, social media management.	Inspires travel decisions and increases the reach of tourism brands.
Sustainable Tourism Specialist	Develops tech-driven solutions for eco-friendly travel.	Environmental science, sustainable practices, green technology.	Reduces tourism's carbon footprint and raises awareness about sustainability.
Tourism App Developer	Designs mobile applications for travel planning, booking, and on-the-go guides.	App development, API integration, user-centric design.	Simplifies the traveller's journey and provides convenience at every step.
E-Tourism Consultant	Advises businesses on digital integration for enhanced customer experience.	Digital strategy, IT consulting, market knowledge.	Bridges the gap between traditional tourism and digital transformation.
Blockchain Specialist	Uses blockchain for secure payments, fraud prevention, and transparent bookings.	Blockchain development, cryptography, fintech knowledge.	Enhances security and trust in the tourism ecosystem.
Drone Photographer/Video-grapher	Captures aerial views of destinations for marketing and promotions.	Drone operation, aerial photography, video editing.	Creates unique visual content that sets destinations apart in the market.
Tourism Cyber-security Specialist	Ensures safety of digital platforms used for bookings, payments, and data storage.	Cybersecurity protocols, ethical hacking, IT risk management.	Protects businesses and travellers from online threats, building trust in digital tourism.
AI in Personalisation Expert	Designs AI systems to tailor travel recommendations based on individual preferences.	Machine learning, personalisation algorithms, data science.	Delivers hyper-personalised experiences, increasing traveller satisfaction and loyalty.

India-Indonesia Relations ...

fuelled by disruptions in global edible oil supply chains due to the Russia-Ukraine war. However, imports experienced a 19% decline from 2022 to 2024, attributed to Indonesia's temporary palm oil export ban and India's push for self-reliance through the *National Mission for Edible Oils - Oil Palm* (NMEO-OP).

Exports: Indian exports to Indonesia displayed resilience even during global downturns, growing by 69% between 2020 and 2022. Key exports included mineral fuels, refined petroleum, and vehicles. However, recent years witnessed a 40% decline, with policy interventions such as bans on rice and wheat exports and export tariffs on vegetables impacting trade flows.

Hence, despite prospects for growth, the India-Indonesia trade relationship faces notable challenges:

- **Trade Imbalance:** Indonesia has consistently maintained a trade surplus with India, which widened to \$17.4 billion by 2024.
 - **Concentrated Trade Portfolio:** Trade remains overly dependent on a few commodities like palm oil, coal, and refined petroleum, exposing both nations to sectoral vulnerabilities.
 - **Non-Tariff Barriers (NTBs):** NTBs affect 70% of Indonesia's tariff lines and 45% of India's, impeding smooth trade flows.
 - **Low FTA Utilisation:** Despite AIFTA's potential, utilisation remains low at approximately 25%, limiting the agreement's efficacy.
- Nevertheless, the trade relationship between India and Indonesia is ripe with opportunities for diversification and expansion:
- **Digital Economy:** Both nations have made remarkable strides in digital transformation. Collaboration in digital public infrastructure, MSME digitalisation, and innovation can unlock significant trade and investment opportunities.
 - **Sustainable Energy and Infrastructure:** With Indian investments exceeding \$54 billion in Indonesia, renewable energy and infrastructure projects present avenues for deepened engagement. India's top energy firms can play pivotal roles in these sectors.
 - **Diversification in Exports:** Indonesia can emulate Singapore's model by diversifying its export portfolio into technology, pharmaceuticals, and manufacturing. Such a shift would reduce its reliance on palm oil and coal while fostering greater resilience.

Development of Indonesia's New Capital: Opportunities for India

Indonesia is embarking on an ambitious project to relocate its capital from Jakarta to Nusantara in East Kalimantan, Borneo. This shift is driven by challenges in

Jakarta, such as severe congestion, environmental concerns, and the city's vulnerability to flooding due to rising sea levels. The new capital aims to be a sustainable, modern, and smart city, reflecting Indonesia's aspirations for long-term growth and urban resilience.

For Indian companies, this massive infrastructural undertaking presents significant opportunities in key areas:

Construction and Infrastructure Development: The development of Nusantara requires extensive construction of residential, commercial, and government buildings, as well as essential infrastructure like roads, bridges, and public utilities. Indian construction firms can bring their expertise in large scale projects, leveraging cost-effective solutions and innovative technologies.

Smart City Solutions: Nusantara is envisioned as a smart city, integrating advanced technologies for energy efficiency, waste management, water supply, and urban planning. Indian firms specialising in IoT (Internet of Things), AI-driven urban management, and green technologies can contribute significantly to this goal.

Urban Mobility Solutions: Efficient transportation systems are a cornerstone of Nusantara's development. Indian companies can offer expertise in:

- **Metro and Rail Systems:** Drawing from successful metro projects in cities like Delhi, Bengaluru, and Mumbai.
- **Electric Vehicles (EVs):** Providing sustainable transportation options, given India's progress in EV technology and manufacturing.
- **Urban Planning Technologies:** Leveraging data-driven approaches for traffic management and smart transport networks.

Renewable Energy Projects: To ensure sustainability, Nusantara plans to rely heavily on renewable energy. Indian companies specialising in solar, wind, and bioenergy solutions can support the development of green energy infrastructure for the city.

This collaboration aligns with Indonesia's goal of attracting international expertise and investment while giving Indian companies access to a rapidly growing Southeast Asian market. By participating in the capital development, Indian companies can strengthen bilateral economic ties, expand their regional presence, showcase their capabilities in smart city and infrastructure projects on a global stage.

India-Indonesia trade relations stand at a critical juncture. While geopolitical disruptions, domestic policy interventions, and sectoral dependencies pose challenges, the resilience and mutual goodwill between the two nations indicate a promising future. By leveraging shared strengths, addressing trade imbalances, and fostering innovation, India and Indonesia can ensure a mutually beneficial economic partnership that stands the test of time.

Tech Meets Travel...

travellers to explore destinations from the comfort of their homes. Blockchain-powered solutions are ensuring secure and transparent booking transactions, enhancing trust and efficiency.

Additionally, digital market-places are promoting regional handicrafts, empowering local artisans while reaching global audiences. Government initiatives like Startup India and tourism-focused incubators provide the necessary support for entrepreneurs to scale and sustain their ventures. With a blend of innovative technologies, consumer-centric approaches, and ecosystem support, the tourism sector is becoming a fertile ground for disruptive startups to thrive and redefine travel experiences.

Imperative of Upskilling for Tourism Professionals

The tourism industry is undergoing a

profound transformation driven by technology, changing customer expectations, and the demand for sustainable practices. For professionals already working in the sector, upskilling is no longer optional but essential to remain competitive and relevant. By acquiring new skills, such as proficiency in digital tools, understanding sustainable tourism practices, and leveraging data for decision-making, professionals can enhance their efficiency, broaden their career prospects, and contribute to the industry's growth. Platforms like SWAYAM MOOCs offer accessible, affordable, and high-quality courses tailored to the evolving needs of the tourism sector, enabling professionals to adapt and thrive in this dynamic field.

Tourism Related Courses on SWAYAM MOOCs

1. Tourism Marketing and Promotion: This course focusses on modern digital marketing strategies specific to the tourism industry, helping

Defence Relations

While, Indonesian President Mr. Prabowo Subianto has ensured continuity with the earlier regime's policies vis-a-vis the traditional principles of non-alignment (*bebas dan aktif*), his military background and focus on national security suggest a pivot towards a more robust defence and security policy. He has emphasised prioritising modernisation of the armed forces and enhancement of maritime capabilities, acting upon his campaign assertion that "national power must be military power."

This shift provides India with an opportunity to collaborate in defence modernisation, leveraging its growing expertise as a global defence exporter.

India and Indonesia's defence cooperation has been progressively institutionalised through initiatives such as:

- **The Comprehensive Strategic Partnership (2018):** Establishing a framework for expanded defence and maritime cooperation.
- **Bilateral Naval Exercises (*Samudra Shakti*):** Fostering interoperability and strengthening maritime security.
- **The Shared Vision of Maritime Cooperation in the Indo-Pacific (2018):** Affirming mutual commitment to a free and open Indo-Pacific.

With President Prabowo's focus on bolstering Indonesia's naval and air forces, India's capabilities in shipbuilding, radar systems, aerial drones, and maritime patrol aircraft make it an ideal partner. The India-Indonesia Defence Industry Exhibition-cum-Seminar, held in Jakarta in April 2024, which showcased 36 Indian defence companies, was a promising step forward.

Opportunities for Collaboration

Maritime Security and Capacity Building: Indonesia's geographical location as an archipelagic nation and its overlapping claims with China in the Natuna Sea make maritime defence a critical priority. India, with its advanced naval technologies and shared interests in maintaining a rules-based maritime order, can:

- Provide patrol boats, frigates, and radar systems.
- Collaborate on maritime domain awareness through joint exercises and information-sharing.
- Support Indonesia's efforts to deter illegal fishing and assert its sovereignty in disputed waters.

Defence Modernisation and Technology Transfer: President Prabowo's defence modernisation programme, with a projected \$46.6 billion expenditure for 2024-2029, focusses on upgrading equipment and building a domestic defence industry. India can:

- Supply advanced defence systems such as the BrahMos supersonic missile, which has already proven its value in the Philippines.

professionals understand how to promote destinations and services effectively.

Key Skills: Digital marketing tools, social media campaigns, and online consumer behaviour analysis.

2. E-Tourism: With the digitalisation of tourism, this course equips professionals with the knowledge to manage online booking systems, create virtual tours, and leverage social media for brand visibility.

Key Skills: E-commerce platforms, virtual tour creation, and digital brand management.

3. Geographical Information System (GIS) in Tourism: GIS technology plays a crucial role in planning and managing tourism resources. This course enables professionals to use spatial data for decision-making.

Key Skills: GIS mapping, resource allocation, and tourism impact analysis.

4. Sustainable Tourism Management: As sustainability becomes a priority, this course introduces tools and strategies to

- Offer co-production and technology transfer agreements to boost Indonesia's domestic manufacturing capabilities.
- Partner on cutting-edge technologies, including AI and autonomous systems for defence applications.

Joint Defence Development: The underutilisation of Indonesia's air force and naval modernisation targets presents an opportunity for India to:

- Offer training programmes and joint development initiatives.
- Explore collaborations in aerospace technologies and defence aviation.

Strategic Relevance in the Indo-Pacific

A stronger India-Indonesia defence partnership aligns with both nations' strategic objectives in the Indo-Pacific. Indonesia seeks to deter China's assertive actions in the South China Sea, while India's Act East Policy emphasises enhancing its strategic footprint in Southeast Asia. A collective maritime security posture would enhance regional stability, strengthen ASEAN's centrality in Indo-Pacific geopolitics, and reaffirm India's role as a credible security partner in Southeast Asia.

Challenges to Address

While opportunities abound, challenges must be navigated:

- **Non-alignment Policies:** Indonesia's cautious approach to alliances could limit the scope of defence cooperation.
- **Trade Barriers and Procedural Delays:** These may hinder the smooth implementation of defence agreements.
- **China's Influence:** Indonesia's economic ties with China might influence its policy decisions, necessitating enhanced strategic diplomacy on India's part.

By taking proactive steps, such as institutionalising regular dialogues, expanding defence trade, and investing in joint maritime initiatives, India can solidify its position as a key strategic partner to Indonesia.

As Southeast Asia's largest economy and ASEAN's most influential member, Indonesia is pivotal to India's Indo-Pacific strategy. Strengthening defence relations will not only enhance bilateral ties but also position India as a leading security partner in the region, contributing to a stable, prosperous, and rules-based Indo-Pacific.

India and Indonesia, united by geography and shared challenges, must now work towards transforming potential into tangible outcomes for mutual benefit. The Prabowo administration offers a promising horizon to elevate this partnership to unprecedented heights.

Continued from page 1

Zorawar Light Tank ...

Ideally, one would like to maximise these three primary characteristics and be best equipped. However, there's a catch, enhancing any one among these adversely affects the other two. Any enhancement in protection or a more powerful gun for example, increases the weight too and cannot be achieved without compromising the tank's mobility. In practice therefore, a major component of Battle Tank design involves balancing these three and optimising the tank for a given set of battlefield scenarios.

With CVRDE-the Combat Vehicles Research and Development Establishment as lead laboratory, the DRDO has carried out pioneering work in areas related to Armoured Combat Vehicles. Thus, Arjun Main Battle Tank (MBT) was indigenously designed and developed in accordance with a very stringent set of requirements laid down by the Army that included accommodating a crew of four in the tank. The development was taken up in an era when our country was yet to have an indigenously designed, developed and manufactured car or motorcycle. The required industrial ecosystem was simply non-existent.

Though designed to operate across the country except high mountains, Arjun MBT was mainly required to operate in desert regions along our western borders and was termed as "Dessert Ferrari" by an independent team of foreign experts.

Arjun MBT, incorporating the requirements projected weighed about 62 tonnes, comparing well with the state of the art in the Four crew tank category though with lesser (better) ground pressure and high power to weight ratio. Two regiments were inducted. The Army then desired several additional features to be incorporated in Arjun while upwardly upgrading existing ones, including the levels of all the three primary requirements leading to an increase in weight to about 68 tonnes. Accordingly, Arjun Mk1A, a tank ready to meet the most challenging battlefield requirements of the 21st century, was promptly developed, realised and has undergone intensive evaluation by the user.

Meanwhile, during peak Covid-19 pandemic, the recent Chinese aggression in 2020 in the high altitude regions of Bharat-Tibet borders necessitated the

need for an ultra light armoured combat vehicle. The Army laid down detailed requirements and mandated airlift capability as one of the essential requirements.

It's noteworthy that nearly the entire regions of past and possible future armed conflicts along the 3488 km long Bharat-Tibet border are situated at 3000 to 5500 meters above mean sea level altitudes and are characterised by extremely difficult terrain. This makes accessibility by road, especially during winter months when the entire region gets snow bound with temperatures dropping to 30 to 50 degree Celsius below zero, besides low atmospheric pressures and oxygen levels, strong winds, snow wizards and frequent avalanches and landslides. Feasibility of airlifting the tank also acts as force multiplier as well as adds to deterrence.

Zorawar Light Tank is a versatile and agile Armoured Combat Vehicle with its fire power, level of protection, mobility as well as surveillance and communication capabilities optimised for the world's most challenging, harsh and the highest altitude battlefields; to boldly go and fight where no tanks have gone and fought before. The expertise gained, the technologies mastered and the R&D cum industrial ecosystem created during the course of development of Arjun MBT, combined with enthusiastic support Army and extraordinary hard work by the Zorawar development team enabled speedy development of Zorawar.

Fire Power

A 105 mm Rifled Bore Gun was chosen as compared to 120 mm gun used for Arjun MBT in order to keep the overall weight of the tank within limits. The gun is considered sufficient in view of the requirements and limitations posed by the mountainous battlefield scenarios under which the tank is required to operate. The use of rifled barrel induces spin to the projectile. A spinning projectile is more stable in its trajectory and hence yields better accuracy and kill probability.

A wider range of gun elevation (-10 to +40 degree) makes fire power of Zorawar highly effective in mountainous regions. The all weather hunter killer Fire Control System with Automatic Target Tracker makes the lethality of Zorawar Light Tank exceptionally high and a nightmare for the enemy in a battlefield. Its combat capabilities are further enhanced by its

coaxial 7.62 mm Coaxial Gun while its 12.7 mm gun on Remote Controlled Weapon Station (RCWS) provides defence against aerial and ground threats.

Firing of three kinds of ammunition namely the Fin Stabilised Armour Piercing Discarding Sabot (FSAPDS), High Explosive Squash Head (HESH) and Anti Tank Guided Missile (ATGM) from the gun has been demonstrated so far. Designed to defeat enemy tank's armour by piercing it, FSAPDS rounds are fin stabilised yielding highly flat trajectory, hence excellent accuracy. This, combined with the extremely high kinetic energy of the high velocity Tungsten alloy penetrator make FSAPDS the most lethal unguided anti tank kinetic energy ammunition, capable of destroying all known tank armour in direct shooting range Zorawar is likely to encounter in high altitude battlefields. HESH ammunition on the other hand generates shockwaves by blast on the surface of the target, leading to fracture of the armour. An ATGM of course is the ultimate weapon being a precision guided munition designed to defeat tank armour. Auto-loader on the other hand ensures uninterrupted firing rate in accordance with design parameters. The Gun Control System is electro-mechanical, leading to lower maintenance and better performance.

Mobility and Agility

Innovative design of Zorawar with its high speed, light weight, high power to weight ratio and low ground pressure combined with Rubber Band Track and amphibious capability make it very agile and extends its reach to most difficult regions of terrain usually considered unreachable by combat vehicles. A very innovatively designed rubber tracks besides being significantly lighter in weight, yield better fuel efficiency, and significant noise and vibration resistance. The Hydrogas Suspense Unit makes the ride smoother and provides better grip on the ground and enhanced stability for the tank. Amphibious capability comes handy in overcoming obstacles like rivers, rivulets and lakes with relative ease. Inertial Navigation System enables the crew to have realtime awareness of their own location independent of external inputs and to find their path.

Survivability

Survivability of the crew and the tank are interrelated and important. Provision of heating and cooling in the tank compartment not only protects the crew from extreme climatic conditions prevalent in the high altitude regions, it also enhances the alertness and overall performance of these soldiers. The provision of surveillance drones takes the level of situational awareness to new heights.

In addition to the primary and secondary armour mentioned in the table, Zorawar is equipped with Laser Warning System (LWS), protection against Nuclear Biological and Chemical (NBC) threats and Integrated Fire Detection and Suppression System (IFDSS). Laser guided munitions being very precise, are extremely serious threats for a tank. They work by homing down to the target that is being shone by a laser designator. LWS works by detecting the incident laser beam and initiating defensive action (eg by generating smoke cover that absorbs/scatters the designating laser beam). IFDSS is microprocessor controlled system that detects any fire or explosion inside the tank and activates the inbuilt automatic fire suppression system in milliseconds domain. Such advanced and effective survivability measures also acts as great self-confidence building measures for the crew.

Features of Zorawar Light Tank

Parameter	Zorawar ILT
Combat weight	~25 tonnes
Number of crew	3
Transportability	Air, Rail, Road
Fire power	
Main armament	105 mm Rifled Bore Gun
	HESH, FSAPDS and ATGM
Ammunition	500 mm DoP (FSAPDS)
Lethality	-10 to +40 degree
	Auto loader
Gun elevation	
	All Electric GCS. All weather hunter killer FCS with ATT
Ammunition loading	
	12.7 mm RCWS
Weapon control	7.62 mm Coaxial Gun
Secondary armament	
Mobility	
Maximum Speed	>65 km/hr
Power Pack	Diesel engine
Running Gear	HSU, Rubber band track
	~27 hp/tonne @MSL
Power to Weight Ratio	
NGP	<0.7 kg/sq. cm.
Amphibious	Capable
Fording	1.5 m depth
Navigation	Inertial Navigation System
Special Systems	Auxiliary Power Unit, Crew Compartment Heating and Cooling, Surveillance Drones
Survivability	
Passive Protection	All round: STANAG level 2
	Frontal Arc: Level 4
Add on Armour	
Secondary Protection	LWS, NBC and IFDSS

Thus, the light tank Zorawar, designed to operate in the world's harshest mountainous battlefield conditions is a versatile and highly advanced war fighting platform well equipped with state-of-the-art offensive and protective systems ready to prove itself a game-changer in mountain warfare anywhere in the world. Zorawar therefore offers immense potential for exports in addition to providing winning edge to our own armed forces.

The Zorawar is in its final stages of development trials and is soon going to enter user trial process as a precursor to induction. A Ministry of Defence press statement released on September 13, 2024 announced, "During the field trials conducted in the desert terrain, the Light Tank demonstrated exceptional performance, efficiently meeting all the intended objectives. In the initial phase, the tank's firing performance was rigorously evaluated and it achieved the required accuracy on designated targets".

- OBC-NCL certificate should be in central format for the current financial year (FY 2024-25).
- Disability certificates should be as per the latest prescribed Central Govt. Format generated online through the Swavalamban/UDID portal (clearly indicating the type & percentage of disability) in line with the identified disability for the posts as mentioned in this advertisement.
- EWS candidates need to submit current year Income & Asset certificate in the prescribed format i.e. the certificate should be valid for FY 2024-25 based on the income of FY 2023-24.

Note- The candidates should necessarily upload all documents while applying. Applications with incomplete/insufficient documents are liable to be rejected/not considered for further process.

HEALTH

The candidate should have sound health. Before joining, candidates will have to

undergo medical examination at any of the NTPC hospitals and the decision will be final & binding. No relaxation in health standards is allowed. Detailed medical norms are available on the website careers.ntpc.co.in

GENERAL CONDITIONS

- Only Indian Nationals are eligible to apply.
- All qualifications should be from Universities/Institutions recognized & approved in India.
- All computations of age/experience requirement/qualification shall be done w.r.t. the last date of receipt of online application as mentioned in the advertisement.
- Candidates claiming to belong to any particular category shall necessarily have a valid SC/ST/OBC-NCL/Disability/EWS certificate, as the case may be, from the Competent Authority. Where there is vacancy identified for such category,
 - upper age limit is relaxed by 5 years for SC/ST candidates, by 3 years for OBC-NCL candidates, by 10 years for PwBD candidates. Relaxation of age to Ex-Serviceman will be as per Govt. guidelines.
 - in terms of educational qualification, only pass marks are required by SC/ST/PwBD candidates in order to apply.
 - the total years of experience will be relaxed by 1 year for SC/ST candidates.
- Depending on the requirement, the Company reserves the right to cancel/restrict/curtail/enlarge the number of vacancies, if need so arises, without any further notice and without assigning any reason thereof.
- In order to restrict the number of candidates, if so required, the management reserves the right to conduct multi-stage selection process which may comprise of application shortlisting/screening (based on qualification/percentage of marks, no of years of experience, etc.), written/computer-based test, personal interview, etc. or combination of the above or to raise the minimum eligibility standards/criteria, as per requirement.
- Posting shall be at any of the Stations/Projects/JVs/Subsidiaries/Corporate Centre of NTPC. All posts are transferable at the sole discretion of the Management.
- While applying for the post, the applicant should ensure that he/she fulfills the eligibility and other norms mentioned above, as on the specified dates and that the particulars furnished are correct in all respects. In case it is detected at any stage of recruitment that a candidate does not fulfill the eligibility norms and/or that he/she has furnished any incorrect/false information or has suppressed any material fact(s), his/her candidature will stand automatically cancelled. If any of the above shortcoming(s) is/are detected even after appointment his/her services are liable to be terminated without any notice. Canvassing in any form shall disqualify the candidate.
- The mere fact that a candidate has submitted application against the advertisement and apparently fulfilling the criteria as prescribed in the advertisement would not bestow on him/her the right to be definitely called for interview/considered further for selection process.
- Any proceedings in respect of any matter of claim or dispute arising out of this advertisement and/or an application in response thereto can be instituted only in Delhi and courts/tribunals/forums at Delhi only shall have sole and exclusive jurisdiction to try any such cause/dispute.
- In case any ambiguity/dispute arises on account of interpretation in versions other than English, the English Version will prevail.

HOW TO APPLY

Interested candidates should log on to our website careers.ntpc.co.in or visit careers section at www.ntpc.co.in for applying. No other means/mode of application shall be accepted. Candidates are required to possess a valid email ID. NTPC will not be responsible for bouncing back of any email sent to the candidates. Candidates belonging to General/EWS/OBC category are required to pay a non-refundable application fee of ₹300/-. The SC/ST/PwBD/XSM category & female candidates need not pay the application fee.

Payment in offline mode: State Bank of India has been authorized to collect the application fee, in a specially opened account (A/C No. 30987919993) at CAG branch, New Delhi (Code: 09996), on behalf of NTPC. Candidate has to approach the nearby SBI branch with a printout of the "pay-in-slip" which is available on the application portal. The pay-in-slip printed from the portal should only be used for depositing the fee for proper crediting of amount in the allocated account. On receipt of the money, the bank will issue a unique Journal Number and a Branch Code of the bank collecting the money. This journal number and the branch code are to be filled up by the candidate during online application. NTPC will not be responsible, in case a candidate deposits the fee in wrong account.

Payment in online mode: Candidates also have the option to pay the fees online (through Net banking/Debit Card/Credit Card). The online payment option will be available in the online application form.

Fee once paid will not be refunded under any circumstances. Candidates are therefore requested to verify their eligibility criteria before paying the application fee. After applying online, candidate is required to download the application slip generated by the system with unique application number. Copy of application slip may be retained by the candidate for future reference. No document is required to be sent to us by post.

It is mandatory that eligible candidates go through the full text of the advertisement and agree to all the conditions given, while applying for the post. Any further addendum / corrigendum/updates will only be published on our website.

Commencement of online application : 21.01.2025
Last date for online application : 04.02.2025

75 YEARS OF THE INDIAN CONSTITUTION

A Journey Towards Absolute Glory

Dr. Ashwini Siwal

As India celebrates 75 years of its Constitution, it is essential to reflect on the remarkable journey of this foundational document and the nation it has shaped. Adopted on November 26, 1949, the Constitution of India stands as a testament to the aspirations of a diverse and vibrant society, embodying the principles of justice, liberty, equality, and fraternity. This journey has not just been about governance but also about the evolution of a democratic ethos, resilience in the face of challenges, and the relentless pursuit of inclusive growth.

On November 26, 1949, the Constitution was adopted, marking a momentous occasion in India's history. This date is celebrated annually as 'Constitution Day', reflecting the significance of this event in establishing India as a sovereign nation. The Constitution officially came into effect on January 26, 1950, a date now commemorated as Republic Day, symbolising the transition from colonial rule to self-governance.

Key features of the Constitution included Fundamental Rights, which guaranteed individual liberties and protections against discrimination, and Directive Principles of State Policy, aimed at guiding the state toward achieving social and economic justice. These elements underscored the Constitution's commitment to not only political democracy but also social equity. As the years progressed, the Constitution proved adaptable to changing socio-political dynamics.

Evolution of the Constitutional Values

Legal scholar, Harvey Walker has maintained that "The Constitution must be developed out of the lives and aspirations of the people and not borrowed from others. The fundamental and values of the constitution shall

be in tune with the particular culture and times in order to be useful and lasting." It is very important for the values and institutions that emanate from the Constitution to keep pace with the times. As the Constitution is considered to be an organic document, it shall make space for accommodating complex issues evolving with time. The Indian constitutional debates also vociferously discussed the matter of making the Constitution 'flexible'. Debaters in the assembly relied heavily on the words of Av Dicey, "The immutability of the constitution is the ground for its violent subversion".

Articles 14, 19 and 21 often referred to as the golden triangle of the Constitution, have been a shield to provide relief to major and important sections of Indian society. In *Vishaka v. State of Rajasthan* (1997), the Supreme Court laid down guidelines to prevent sexual harassment at the workplace, recognising that such harassment violates fundamental rights under Articles 14, 19, and 21. This judgement became a cornerstone for women's rights and workplace safety in India. Another important judgement upholding the rights of the women in Indian society is *Shayara Bano v. Union of India* (2017), wherein the Supreme Court declared the practice of instant triple talaq (*talaq-e-biddah*) unconstitutional, affirming that it violates the fundamental rights of Muslim women and is against the principles of gender justice.

In the knowledge economy and today's era of information, the law relating to privacy that has evolved from the paraphernalia of the constitutional principles has become a cogent foundation on which relevant contemporary laws are superstructured. In *Justice K.S. Puttaswamy v. Union of India* (2017), the Supreme Court recognised the right to privacy as a fundamental right under Article 21. This

judgement has significant implications for data protection and individual freedoms in the digital age.

Further, the abrogation of Article 370 is another watershed moment having the propensity to alter the constitutional conscience. The Constitution Bench of the Supreme Court unanimously affirmed the authority of the President of India to revoke Article 370 of the Indian Constitution. The abrogation in August 2019 resulted in the division of the former state of Jammu & Kashmir into two Union Territories, J&K and Ladakh, and stripped the state of its special rights. The Supreme Court stated that Article 370 was merely a provisional measure to enable the admission of the former princely state to the Union of India during a period marked by internal turmoil and external threats. The Supreme Court stated that Jammu and Kashmir did not maintain any aspect of sovereignty upon its accession to India.

As noted above, the judiciary has played a pivotal role in interpreting the Constitution and expanding its scope in the last 75 years. Landmark judgements have upheld the rights of marginalised communities, reinforced gender equality, and ensured environmental protection over the years. The dynamic nature of constitutional interpretation has allowed it to evolve with societal needs, making it a living document that resonates with contemporary values. These judgements discussed above reflect the dynamic nature of the Indian Constitution and its ability, *inter alia*, to adapt to contemporary issues such as the protection and expansion of fundamental rights in a diverse society.

The author is an Associate Professor in the Faculty of Law in the University of Delhi.

Navigating Profiling Concerns and Criminal Investigations

Kamaljeet Kaur Muni

In the fast-paced world of technology, Artificial Intelligence (AI) is not just a tool for convenience; it's becoming a cornerstone of how businesses, governments, and societies operate. AI's ability to analyse vast amounts of data and predict outcomes has transformed everything from how we shop to how law enforcement approaches crime. With the recent introduction of India's Digital Personal Data Protection Act (DPDP Act) 2023 and the Bharatiya Nyaya Sanhita (BNS) 2023, there are critical shifts in how AI can and should interact with personal data and criminal justice.

The world is witnessing a transformation where laws must now evolve alongside rapidly changing technology. As we dive deeper into the implications of AI in profiling and criminal investigations, it becomes evident that these technologies present both great opportunities and significant challenges. The legal frameworks governing AI usage are essential in ensuring the balance between privacy, security, and innovation.

AI and Profiling

At the heart of most AI systems is the concept of profiling—the process of collecting data to predict behaviour. Whether it's e-commerce platforms suggesting products or streaming services recommending content, AI relies on user profiles that are constantly being updated based on behaviour. This data-driven approach not only enhances user experience but also brings forth concerns about privacy and the misuse of personal data.

The Digital Personal Data Protection Act (DPDP Act) 2023 directly addresses these concerns. By recognising behavioural data as personal data, the law ensures that users' rights are protected. This includes the right to correct or erase their data, forcing AI systems to rethink how they operate. For instance, if a

user opts to erase their data, it disrupts the continuous stream of information that AI models rely on to provide personalised services.

This introduces a fundamental challenge for businesses that have built their platforms around data aggregation. AI-driven services like personalised ads, recommendation engines, and even financial risk assessments depend on large-scale data to function effectively. As data rights become more stringent under the DPDP Act, businesses will need to pivot towards privacy-first AI models that respect user consent while still delivering value. This delicate balance between compliance and personalisation is the new frontier for AI in India.

Globally, similar regulations are emerging. The General Data Protection Regulation (GDPR) in the European Union has had a profound impact on how companies handle data, particularly when it comes to profiling. AI systems, in particular, had to adapt to stringent requirements for obtaining explicit consent before collecting personal data. This shift towards privacy-centric AI is setting a global precedent, and India's DPDP Act is following suit.

Power of AI

AI's predictive capabilities are not new. We've already seen how platforms use predictive algorithms to drive users toward impulse purchases. By analysing user behaviour—what products you search for, how long you spend on a webpage, your browsing patterns—AI can push targeted advertisements that align with your immediate needs or desires.

But imagine if this same predictive power could be harnessed for public safety. Predictive policing aims to do just that. By analysing human behaviour, AI could predict where and when crimes are likely to occur, allowing law enforcement to intervene before incidents happen. This transition from com-

mercial to law enforcement applications highlights AI's transformative potential. But it also requires a significant shift in how law enforcement agencies operate. Predictive models in e-commerce can tolerate some margin of error—sending you an irrelevant ad is not a big deal. But in policing, a false prediction could have serious consequences for individuals and their freedom.

AI in Action at the National Crime Agency (UK):

The National Crime Agency (NCA) in the UK offers a powerful case study in how AI can be applied ethically and effectively in law enforcement. Since 2019, the NCA has employed AI to combat child exploitation by monitoring online behaviour and identifying vulnerable children. This is not a passive system; it actively tracks how children interact with the internet and uses this data to identify potential risks before they escalate into crimes.

This application of AI demonstrates how the technology can be used for proactive policing—preventing crimes from occurring rather than simply reacting after the event. The NCA's model offers valuable insights for India, where similar approaches could be deployed to combat cyberbullying, online harassment, and even terrorist recruitment efforts in cyberspace.

However, the NCA's success also highlights the need for ethical frameworks when using AI in law enforcement. AI systems must be transparent in how they operate, and their decisions should be subject to human review to avoid wrongful targeting. Public trust in AI is crucial, and building systems that are both effective and ethically sound is the only way forward.

Challenges and the Road Ahead

The integration of AI into law enforcement and personalised services brings forward a set of challenges that India must address as it

The Indian Constitution officially came into effect on January 26, 1950, date now commemorated as the Republic Day. The November 2024 issue of the monthly, Yojana carried exhaustive articles on Indian Constitution and is a collector's copy for the aspirants preparing for various competitive examinations for government jobs. Following are few excerpts. For complete articles you can purchase a digital copy from www.publicationsdivision.nic.in, google play books & amazon kindle.

PREAMBLE

WE, THE PEOPLE OF INDIA, having solemnly resolved to constitute India into a **SOVEREIGN SOCIALIST SECULAR DEMOCRATIC REPUBLIC** and to secure to all its citizens:

JUSTICE, social, economic and political;

LIBERTY of thought, expression, belief, faith and worship;

EQUALITY of status and of opportunity;

and to promote among them all

FRATERNITY assuring the dignity of the individual and the unity and integrity of the Nation;

IN OUR CONSTITUENT ASSEMBLY this twenty-sixth day of November, 1949, do **HEREBY ADOPT, ENACT AND GIVE TO OURSELVES THIS CONSTITUTION.**

moves into the future. The DPDP Act 2023 provides a solid framework for safeguarding personal data, but it also raises questions about how businesses can innovate while respecting user privacy. On the other hand, the BNS 2023 opens the door to more advanced AI-based policing, but with that comes the responsibility of ensuring that these technologies do not infringe on individual rights.

Training law enforcement to use AI effectively and ethically is critical. Predictive tools, for example, must be regularly audited to ensure they do not perpetuate biases. Similarly, businesses using AI for profiling must implement safeguards that allow for data corrections and erasure upon user request.

Globally, the conversation about AI and its ethical implications is gaining momentum. The European Union's GDPR and frameworks like the UK's NCAI-based initiatives provide valuable lessons. As India's legal landscape evolves with the DPDP Act and BNS, these global examples offer a roadmap for creating an AI ecosystem that respects privacy, ensures fairness, and leverages technology for the greater good.

Important Constitutional Amendments

SB Singh

Our Constitution, drafted by a galaxy of legal experts and seasoned statesmen, has been the backbone of Indian democracy, guaranteeing not only an elaborate administrative machinery of governance but also a charter of a socio-economic revolution. It is not merely a legal document setting out the fundamental laws for governance of India, but also a living and dynamic document. This document was designed to address the diverse aspirations of the Indian people.

Need for Constitutional amendments: A Constitution is a living document that must reflect the changing socio-economic aspirations of the people whom it is meant to serve. With changing times and circumstances, the aspirations of the people also change, and these changes must be reflected in the constitution by amending it, or else it will cease to be a relevant document and become outdated. Though the framers of our Constitution succeeded in writing a comprehensive document, they were aware of the need to change its provisions in the future and therefore provided for an amendment procedure (Art. 368) in the constitution itself. Amendment means changing one or more parts of the Constitution, and it can be done by adding a new provision, deleting an existing provision, or revising or modifying a provision.

Procedure for amending the Constitution: There are three ways in which our Constitution can be amended:

- By an ordinary law passed by Parliament by a simple majority. For example, admission of new states (Art. 2), creation of new states or altering their areas, boundaries or names (Art. 3), or changes made in the citizenship provisions (Art. 11).
- By following a special procedure given in Art. 368 which requires an amendment bill to be passed by a two-thirds majority in both Houses of Parliament. Most of the amendments are carried out following this procedure.
- By passing an Amendment Bill by Parliament by a two-thirds majority as well as its ratification by at least half of the states if the bill seeks to make changes in

provisions that affect the federal provisions. For example, GST had to be ratified by half of the states also.

Landmark Constitutional amendments since 1950

Though as many as 106 amendments have been made to the Constitution so far, the following are considered major amendments that introduced significant changes in the Constitution.

The First Amendment Act, 1951: the main objects of this amendment were to place 'reasonable restrictions' on laws made on various grounds given in Art. 19 (security of the state, public order, morality, decency, etc.). It also abolished the *zamindari* system and inserted the 9th schedule to the Constitution which provides immunity from judicial review of certain laws, mostly dealing with land reforms.

The Forty Second Amendment Act, 1976: this is also known as the mini Constitution of India, as it carried out wide ranging and drastic changes in the Constitution during the emergency. It amended the Preamble and Directive Principles by adding Arts. 39A (free legal aid), 43A (participation of workers in management of industries), 48A (protection of environment and the wildlife), and insertion of Part IV A to the Constitution providing for fundamental duties. Art. 74 was amended to make the President 'bound by the advice of the council of ministers'. It also provided for tribunals by inserting Art. 323A and 323B in a new Part XIV A. Most importantly, it added clauses (4) and (5) to Art. 368 which gave unfettered powers to Parliament to amend any provision of the Constitution. Passed during emergency, this amendment curtailed civil freedoms, powers of the judiciary, and diluted the fundamental rights.

The Forty Fourth Amendment Act, 1978: This amendment was enacted by the Janata Party government in the background of the 42nd Amendment and the experience of emergency. First, it made changes in Art. 352 relating to proclamation of emergency. The word 'internal disturbance', which was a vague expression and was open to misuse, was replaced by 'armed rebellion'. Further, the written advice of the Cabinet to the President to

proclaim an emergency was made mandatory. Also, it needed to be passed by a two-thirds majority of both houses of Parliament within a month. For its further continuance, it required renewal by Parliament every six months by a two-thirds majority only. Also, Lok Sabha was empowered to revoke it by a simple resolution if ten per cent of its members requested a special meeting to revoke it. Safeguards were also made against preventive detention that could not be continued beyond three months unless an advisory board recommended further detention.

However, the most striking change was made in the Right to Property. So long as it remained a fundamental right, it became problematic for the government to acquire property for public purposes. This was solved once for all by deleting Art. 19(1)(f) and shifting Art. 300 to a new Art. 300 A. thus, today, the right to property is only a legal right and not a fundamental right which means the state can acquire property for a public purpose and one cannot seek remedy under Art. 32 by Supreme Court if one's property is acquired. He can, however, approach ordinary courts, as no one can be deprived of his property except by authority of law.

The Hundred First Amendment Act, 2016: This act brought the GST regime in existence under the 'One Nation One Tax' slogan. It simplified the tax regime in one stroke and is hailed as a great step towards cooperative federalism. Both the union and the states pooled their sovereignty to agree to a common tax regime, i.e., GST.

The Hundred Sixth Amendment Act, 2023: This has finally paved the way for 33 per cent reservation for women in both Lok Sabha and State Assemblies. This became possible after many hurdles faced in passing the bill for nearly two decades. This act, in a single stroke, has empowered Indian women and made our legislatures more representative in gender terms. However, it will come into force only after the next delimitation exercise so that the Delimitation Commission can decide which seats shall be reserved for women.

Role of Indian Constitution in Promoting Social Justice

Prof. Rekha Saxena

The Indian Constitution has been characterised as a social revolution instrument by scholars like Granville Austin. To set Indian constitutionalism apart from the limited concerns of liberal constitutionalism, Kalpana Kannabirani (2012) and Upendra Baxi (2008) have developed the frameworks of 'insurgent constitutionalism' and 'transformative constitutionalism'. The members of the Constituent Assembly have highlighted how the Constitution of India has the power to reshape society.

The Fundamental Rights aimed to promote social revolution by establishing a society in which all citizens would have equal freedom from compulsion or constraint, whether imposed by the state or by society at large. Baxi asserts that the Indian constitution broadens the concept of rights beyond the state to encompass civil society. This is seen in the prohibition of behaviours related to untouchability (Article 17) and the banning of bonded labour and human trafficking (Article 23). He asserts that the Indian constitution exemplifies a modern instance of enabling state intervention against manifestations of cruelty inside civil society. Furthermore, the Indian constitution serves as a mechanism for the empowerment

of Scheduled Castes and Scheduled Tribes by granting them legislative reservations and mandating quotas in education and state employment for these groups, as well as for socially and educationally disadvantaged classes. Some of the important provisions of the Constitution of India prompting the goal of social justice are as follows:

a. 'We the People': This line from the Indian Constitution's Preamble captures the transformative goal. 'We the People' creates a new identity that equalises opportunities and status for those whose identities were previously shaped by caste, religious, and ethnic systems. An 'individual' detached from the principles generated from the framework formed the basis of this identity. It has legal significance in addition to being a significant declaration of independence from colonial control. By decree of the Cabinet Mission Plan, the Constituent Assembly of India was established, responsible for drafting the Constitution for Independent India. 'We the People' is a significant departure from the 1947 Independence Act and the Cabinet Mission Plan's legal restrictions.

b. Universal Adult Franchise: In a hierarchical society, the establishment of the Universal Adult Franchise, which was founded

on the tenets of 'one person, one vote, one value,' was revolutionary. According to some books full citizenship in India is awarded based solely on the requirement of being an adult member, a concept known as the categorical principle of inclusion.

c. Abolition of Untouchability: Untouchability is outlawed in all forms under Article 17 of the Indian Constitution. It aimed to break with the past by putting an end to the long-standing humiliation that some castes had to endure.

d. Right to Equality: According to academics like Martha Nussbaum, the Constitution of India explicitly recognises the idea of substantive equality by going beyond the idea of formal equality and stating that special protective laws that advance the interests of marginalised groups are not to be interpreted as unlawful discrimination.

e. Directive Principles of State Policy: The Directive Principles of State Policy provide a more concise definition of social revolution. According to Austin (1972), the intention behind these concepts was to liberate the Indian masses—that is, to free them from social and natural constraint.

Persons who have minimum one year experience or training in the factories manufacturing ammunition, explosives and hazardous chemicals and handling of the same. Ex Graduate Apprentice of trades Chemical, Electrical, Mechanical etc. who have completed one year Trade Apprenticeship in Ordnance Factories under MIL or factories manufacturing ammunitions and explosives possess skill.

- i) Engagement of Tenure based personnel shall be on contract basis initially for a period of **One year** which **may be extended for another period of Three years i.e. total maximum period of Four years** with renewal on **Yearly** basis from the date of engagement (including initial period) **BASED ON FACTORY** requirement and individual performance. The tenure will come to an end automatically on completion of four years period from the date of joining, without any further notice. The employment can be terminated, at any time, during the period of tenure engagement, by giving one month’s notice by **either side or payment of Basic Pay + IDA Component in lieu of the Notice.**
- ii) There will not be any commitment to the candidate either for absorption as permanent employee or for extension of term.

8) **Process of Engagement:**

- i) Selection of the candidates shall be done based on the Marks scored in B.E./B.Tech and personal Interaction/ Interview only, in the order of Merit.
- ii) Cut off percentage for calling candidates may be decided by the High Explosives Factory, Khadki, Pune for personal interaction/Interview, based on Marks secured in the qualifying examination i.e. B.E./B.Tech prescribed for a particular Trade/Discipline to ensure sufficient competition.
- iii) Merit list will be prepared based on combine marks secured in B.E./B.Tech and personal Interaction/Interview.
- iv) Weightage of Marks in B.E./B.Tech and Personal interaction/Interview will be 85% and 15% respectively.

v) Candidates scoring marks more than cut-off marks in B.E./B.Tech. and Personal Interaction/Interview will be called for Document Verification in the order of Merit. The number of candidates called for Document Verification will be limited to the number of posts notified (Discipline/Category wise).

vi) In case of rejection of candidates during the Document Verification process on account of non-availability of requisite documents/testimonials, not meeting the advertised criteria with respect to Age, Qualification, Experience, etc. next candidates will be called for Document Verification in the order of merit (Discipline/Category wise). The number of next candidates called for Document Verification will be limited to the number of candidates rejected.

vii) The procedure as above will continue till such time the number of candidates qualifying in the Document Verification Process is equal to the number of posts advertised.

viii) Candidates qualifying in the Document Verification stage as above will be issued Offers of Engagement.

11) **Remuneration:**

- i) Tenure Based Personnel to be paid at the rate of 1/30th of the pay at the basic pay plus dearness allowance for work of 8 hours a day.
- ii) IDA as prevalent will be applicable.
- iii) House Rent Allowance as per classification of cities (when Company Quarter is not available).

Note: In case of availability of Company Quarters, priority should be given for allotment of Quarters.

iv) The performance of the individual on fixed term employment will be evaluated. Individuals having performance rating poor or below will be given 01 month’s time in writing to improve their performance. After on month’s again performance will be evaluated and if again the performance rating found poor or below, the services of the individual will be terminated by giving 15 days notice.

- v) Personnel engaged will be eligible for EPF and Employees Compensation Act as per government guidelines.
- vi) Personnel engaged on fixed term basis are eligible to Bonus (if applicable) as per Bonus Act 1965 amended time to time.

12) **Other Benefits and Terms & Conditions:**

i) Personnel engaged will be entitled for 30 days Leave per year. 2.5 days of Leave will be credited, for every calendar month of service. Leave can be accumulated by the Personnel during their tenure up to 30 days and can be encashed after completion of one year. For the last month of service prior to separation/ completion of Tenure, the Leave of 2.5 days pertaining to the last month of service will be credited on the 15th day of that month.

Note: Encashment of Leave in respect of Tenure Based Personnel will be governed by the Rules and Terms & Conditions applicable to the regular employee as notified from time to time.

- ii) Personnel engaged cannot take more than 3 days leave in a month and cannot take continuously more than 3 days leave at a stretch except on medical ground.
- iii) These personnel will not be entitled for any other medical benefits in any of the Ordnance Factory Hospitals & Dispensaries or elsewhere. In case of any emergency, facilities in Ordnance Factory Hospitals / Dispensaries can be availed.
- iv) They will be entitled for safety and protective gears, equipment, kits etc. as per the Company norms.
- v) Female personnel will be entitled to Maternity Benefits as per the provisions under the Maternity Benefit Act, 1961.
- vi) In the normal course, the engagement will be for a maximum period of four years from the date of engagement and the tenure will come to an end automatically on completion of four years period from the date of joining, without any further notice.
- vii) The Tenure Based Engagement will not confer any right on the Personnel to claim the status of a regular employee of the Company.
- viii) The Tenure Based Personnel will abide by various Company/Factory Rules & Regulations governing carrying out the assigned tasks and their conduct.
- ix) Such personnel will be covered under the Income Tax, Service Tax, Professional Tax etc. as per the applicable Rules and all such Taxes would be payable by them at their hands.
- x) They will be eligible for Company Quarters, wherever available. License fee for Quarters will be deducted at the rates as applicable to regular employee.
- xi) **They will not be entitled for the following:**

- a) Promotions;
- b) OT allowance
- c) Loans, Advances & Interest Subsidies;
- d) Medical Facilities;
- e) Contingency Advance;
- f) School Fee , Reimbursement
- g) LTC/LTA Facilities;
- h) Grant of Study Leave
- i) Sponsorship for Higher Studies;
- j) Any other benefits (other than mentioned) admissible to regular employees.

Continued from page 32

- xii) The Tenure Based Personnel will not be entitled for any Allowances or Benefits other than those indicated in this Scheme.
- xiii) Performance of the Personnel would be assessed on a six-monthly basis.
- xiv) The engagement will be on full time basis. Absence from duty other than on authorised Leave / Company Holidays will result in proportionate reduction in the Consoli-dated Emoluments.
- xv) For quitting the job, candidate should give notice one month prior in advance, falling which one month salary will be deducted.
- On account of candidates mistake /fault for any damage to the govt. property happens, same will be recovered from candidates salary.

13) Termination of the Contract Engagement:

The contract engagement will stand automatically terminated on completion of the prescribed tenure/task. The engagement can be terminated even earlier with one month's notice in writing by either side or payment (consolidated remuneration) in lieu of the Notice.

BEST ENTRY FOR

ISSUE DATED 4 - 10 January 2025

Q. The recent amendment to the No Detention Policy for classes 5 and 8 under NEP 2020 allows students to be held back if they fail to meet promotion criteria after re-examination. How do you think will this step enhance learning outcomes and accountability in schools?

Best Entry: For those of us who completed our primary and middle school education, summer holidays were bittersweet. Although they began immediately after exams, we could never fully enjoy them until a self-addressed postcard, submitted to our class teacher, was delivered by the postman. That small card carried a weight far greater than its size- it bore one of two stamped words: "PASSED" or "DETAINED."

These two words held more significance than any detailed performance report could convey. Both children and their parents toiled tirelessly throughout the year to ensure that "PASSED" was stamped on the card. The social stigma of being "DETAINED" was a powerful motivator, driving every student to put their best foot forward.

Later, the government introduced the "No Detention Policy," aimed at reducing student dropout rates. While well intentioned, this policy inadvertently led to a continuous decline in educational standards. It failed to account for the fact that every child learns at a different pace, and some require additional time to master specific skills. Detention, rather than being a punishment, allowed struggling students the opportunity to catch up and solidify their understanding.

Under the 'No Detention Policy' students knew in advance that they would be promoted regardless of their performance. This bred complacency among students and, to some extent, among teachers. Students were neither assessed rigorously on learning outcomes nor held accountable for poor performance. Teachers, too, were limited in their ability to take corrective action, as detention was not an option.

As students advanced to higher classes without mastering foundational skills, teachers in subsequent classes faced increased challenges. This led to a decline in board exam pass percentages. In an attempt to address this issue, state boards began diluting their academic standards, further exacerbating the problem. This vicious cycle continued and its effects became evident in national educational surveys, which consistently highlighted the decline in learning outcomes.

Recognising these challenges, the government eventually reintroduced a more balanced policy, allowing students to be held back when necessary. This ensures that struggling students are given the time and support they need to develop essential skills. Currently, this policy is applicable only to CBSE schools. However, it is imperative that state board schools adopt a similar approach without delay. The sooner they implement this change, the better it will be for students and the overall quality of education in the country.

News Digest

NATIONAL

■ Centre Announces Setting Up of 8th Pay Commission

The Government of India has announced setting up of the 8th Pay Commission for Central Government Employees and Pensioners. Prime Minister Shri Narendra Modi stated it will enhance the quality of life for government employees and boost consumption. The Commission, benefiting over 45 lakh employees and 68 lakh pensioners, will soon have its Chairman and members appointed.

■ India Advances Space Ambitions with Third Launch Pad and SpaDeX Success

India's space ambitions reached new heights with two significant developments: the approval of a Third Launch Pad (TLP) at Sriharikota and the historic success of ISRO's Space Docking Experiment (SpaDeX). The Union Cabinet has sanctioned Rs. 3,984.86 crore for the establishment of the TLP, designed to support Next Generation Launch Vehicles (NGLVs) and future human spaceflight missions. The TLP, targeted for completion in 48 months, will boost India's launch capacity, and create demand for thousands of skilled professionals. Simultaneously, the SpaDeX mission demonstrated spacecraft docking capabilities, making India the fourth nation to achieve this technological feat. SpaDeX showcased critical docking, rendezvous, and undocking operations, essential for missions like the Bharatiya Antariksh Station and lunar exploration. These milestones underscore India's growing self-reliance in space technology and its readiness to attract international collaborations.

These milestones underscore India's growing self-reliance in space technology and its readiness to attract international collaborations.

■ Bharat Startup Challenge to Launch at April's Startup Mahakumbh

India is set to hold a mega convention of startups in April this year, titled the 'Startup Mahakumbh', with an anticipated participation of over 25,000 startups. Announced by Union Minister Shri Piyush Goyal on

National Startup Day (January 16), the event aims to foster innovation by connecting startups, industry leaders, investors, and policymakers on a single platform. A significant highlight of the convention will be the launch of the Bharat Startup Challenge, which will throw open 75 sector-specific challenges in areas such as renewable energy, agritech, and semiconductors. Participants will compete for mentorship opportunities, and funding support, making it an ideal launchpad for groundbreaking ideas. Highlighting the success of the Startup India Mission which has nurtured 1.59 lakh startups and created 17.2 lakh jobs since 2016, Shri Goyal reaffirmed the government's commitment to empowering startups through programmes like the Fund of Funds for Startups (FFS).

■ Mutual Recognition of Skills Key to Global Workforce Mobility: Dr. Mansukh Mandaviya

Union Minister Dr. Mansukh Mandaviya has emphasised that initiatives such as the Mutual Recognition of Skills and Standards can position India as a global talent hub by addressing workforce shortages worldwide. Speaking at the Conference on Future of Jobs in New Delhi on January 15, 2025, he highlighted the importance of aligning skilling programmes with industry needs, fostering innovation, and promoting practical expertise to create a future-ready workforce. He also stressed the need to build strong industry-academia linkages to tailor skilling efforts to India's unique economic landscape. By focusing on sustainability and inclusivity, such initiatives can enable India to play a pivotal role in meeting global workforce demands.

■ Centre Approves Creation of Two New CISF Reserve Battalions

The Central Government has approved the creation of two new Reserve Battalions for the Central Industrial Security Force (CISF), increasing the total from 13 to 15. Each battalion, comprising over 1,025 personnel led by a Senior Commandant, will bolster the CISF's capacity to meet rising internal security demands. These battalions will serve as a trained reserve for high-security assignments, including sensitive installations and high-security prisons, according to the Home Ministry.

INTERNATIONAL

■ India and Singapore Celebrate 60 Years of Diplomatic Ties

India and Singapore has completed 60 years of diplomatic ties. To commemorate the occasion, Singapore's President Mr. Tharman

Shanmugaratnam visited New Delhi and met with President Smt. Droupadi Murmu and Prime Minister Shri Narendra Modi. Prime Minister Modi's discussions with President Shanmugaratnam centered on enhancing cooperation in cutting-edge sectors like semiconductor

manufacturing, digital infrastructure, and workforce skilling to meet future demands. The leaders expressed optimism about leveraging these areas to benefit the people of both nations and boost economic growth.

■ India, Nepal Partner for 900 MW Upper Karnali Hydropower Project

The Indian Renewable Energy Development Agency (IREDA) has signed a joint venture agreement with SJVN Ltd., GMR Energy Ltd., and Nepal Electricity Authority (NEA) to develop the 900 MW Upper Karnali Hydropower Project in Nepal. The project, under a Build-Own-Operate-Transfer (BOOT) model with a 25-year term, aims to boost regional energy security and promote renewable energy growth. IREDA CMD Shri Pradip Kumar Das described the initiative as a milestone in cross-border collaboration, combining economic and environmental benefits.

■ India Joins UN Panel on Big Data for Official Statistics

India has joined the UN Committee of Experts on Big Data and Data Science for Official Statistics, marking a significant step in enhancing its statistical ecosystem. As a member, India will contribute to shaping global standards for leveraging big data and data science in official statistics, while showcasing its initiatives like the Data Innovation Lab and exploration of alternate data sources. The committee focusses on addressing challenges and opportunities in using big data, including its role in monitoring and achieving Sustainable Development Goals.

ECONOMY

■ QS World Future Skills Index Ranks India 2nd in Digital Skills

Prime Minister Shri Narendra Modi has expressed pride in the Quacquarelli Symonds (QS) World Future Skills Index ranking India second globally for digital skills, placing it ahead of countries like Canada and Germany. The index assesses nations on their ability to prepare students and professionals with future-ready skills, hence, the ranking highlights India's strong focus on digital education, innovation, and enterprise.

The Prime Minister credited this achievement to a decade of government initiatives aimed at empowering youth with skills that align with the growing demand of the industry.

■ Startups Thriving in Tier 2 and 3 Cities

On completion of nine years of Startup India Programme, Prime Minister Shri Narendra Modi said the programme has empowered countless youngsters, turning their innovative ideas into successful startups. India's startup ecosystem is witnessing rapid growth, with over 1.5 lakh startups registered in the past nine years, according to DPIIT Secretary Shri Amardeep Singh Bhatia. Briefing the media in New Delhi, he highlighted the surge of startups in tier 2 and 3 cities, now spanning 779 districts. He also noted the rise in states and UTs with dedicated startup policies, increasing from 4 in 2016 to 31. Government initiatives like the Seed Fund Scheme, Funds of Funds Scheme, and Credit Guarantee Scheme were credited for fostering this growth and serving as models for other departments.

■ Sports Minister Urges Corporates to Boost India's 2036 Olympic Dream

Union Sports Minister Dr. Mansukh Mandaviya chaired the first-ever CSR round-table conference for sports development, urging corporates to adopt a sport and contribute towards placing India in the top 10 at the 2036 Olympics. Dr. Mandaviya highlighted the critical role of Public-Private Partnerships (PPP) in building sustainable sports infrastructure and proposed upgrading district-level sports facilities and creating Olympic Training Centres. Over 40 corporate leaders participated, sharing insights on enhancing India's sports ecosystem. Industry leaders praised the initiative as a gamechanger, committing support for rural sports, district-level schools, and the Khelo India mission to nurture young talent and improve India's global sporting performance.
